

# AVM Recommended Systems

We've selected the AVM systems that offer the best sonic performance and value, and a logical upgrade path. Items with the [QS] designation are on our Quick Ship program which means we do our best to keep them in stock at all times.

## CS 6.3 All-In-One Streaming Receiver - \$17,995

The CS 6.3 is a true high-end all-in-one system with no shortage of features including; a quad 384/32 bit DSD 128 DAC, Bluetooth 4.2, high quality CD drive, USB and SPDIF inputs, support for external drives and USB sticks, and a Class A headphone amp. The powerful amplifier delivers 250 watts/channel. The unit is Roon Ready and supports all popular streaming services. Control is by iOS or Android apps. [QS]

## A 5.2 Integrated Amplifier - \$8,995

The A 5.2 is a modern, versatile and powerful integrated amplifier that was designed for customers who prefer to have fewer components and want an elegant, easy to use sound system. Optional DAC and Phono plug-in cards can be added any time at \$895 each. With a generous 185 watts per channel and AVM's 83T triode tubes, the A 5.2 drive any loudspeaker and delivers sublime musicality. [QS]

## A 6.2 ME High Performance Integrated Amplifier - \$10,995

The A 6.2 ME (Master Edition) is an integrated amp designed with a single goal: provide the best sound quality attainable. Utilizing a high-speed MOSFET output stage, it produces 180 watts per channel driving even demanding loudspeakers to full orchestral levels. The A 6.2 ME runs in purist Class A for normal listening, thanks to a power supply with a massive toroidal transformer and 120,000 microfarads of AVM's proprietary capacitors. Outstanding value for money. [QS]

## A 8.3 Reference Integrated Amplifier - \$21,995

The A 8.3 delivers world-class sound quality and versatility in a single-chassis unit. A true dual-mono design, with four separate power supplies and a tube input stage, the A 8.3 provides relaxed, detailed sound and rock-solid stereo imaging. With 225 watts the A 8.3 provides dynamic drive for even demanding speakers. System integration is assured with 2 sets of speaker terminals, home theater/AV bypass, and a pair of 10 volt triggers. Class A headphone amplifier, 384/32 bit DSD 128 DAC, Bluetooth 4.2, RCA and XLR inputs and outputs are all included in this ultimate integrated music system. [QS]

### PA 5.2 / SA 6.3 – High Performance Separates - \$21,790

The performance level rises significantly when you move up to AVM separates. The PA5.2 / SA 6.3 combination provides breath-taking, lifelike sound quality with 225 watts per channel from a compact, elegant system. The SA 6.3 features three separate power supplies, and a hefty toroidal power transformer ensures that the fully-balanced circuitry, with 20 high-current MOSFET output devices per channel, will reproduce music with all its power and impact. **[QS]**

### PA 8.3 / SA 8.3 – Reference Stereo System - \$46,580

Our reference PA 8.3 preamplifier sets a new standard for sound quality and versatility. Optional plug-in cards provide exactly the options you need with future flexibility. The SA 8.3 amplifier's tube input stage preserves delicate musical detail and ambience while massive dual power supplies, with a separate toroidal transformer for each channel, yield an effortless 450 watts/channel from the high-current MOSFET output stages. Superb transient response and unlimited dynamic range provide a magical listening experience, and a USB software update port guarantees decades of future-proof performance.

### PA 8.3 / MA 8.3 – Reference Monoblock System - \$71,580

The MA 8.3 combines the delicacy and precision of a tube input stage with the power and unlimited dynamics of a high-current MOSFET output stage featuring 48 closely-matched devices and 1,000 watts per channel. When partnered with our flagship PA 8.3 preamplifier, this combination delivers a most natural and detailed sound with real-life dynamics.

This system will drive any loudspeaker with unmatched slam and drive, while maintaining immense reserve capacity, ensuring orchestral crescendi are reproduced with their full glory. Ultra-short signal paths and massive power supplies containing 5 transformers and capacitor banks with 40,000 microfarads yield unmatched transient ability and thrilling dynamic contrasts. The MA 8.3 is the pinnacle of the AVM line, and provides state of the art sound and lasting value.

**[QS]** Denotes models on Quick Ship Program.

All power ratings quoted into 8 Ohms.

Prices in Canadian Dollars. April 2021.
