

Introducing Hugo

The World's Most Advanced Portable DAC / Headphone Amplifier

The new Hugo from Chord Electronics is the world's most advanced headphone amp/DAC. It offers studio-master-tape sound quality, advanced connectivity and the ability to play all the latest file formats all from a palm-sized player.

"The Hugo is another giant leap for digital kind. I implore you to have a listen."

- David Price, HiFi Choice, July 2014

"Hugo is a tour-de-force of engineering and delivers fabulous sound quality with all files. It's also very easy to use."

- Noel Keywood, Hi-Fi World, July 2014

"It possesses that elusive 'X' factor, which marks the difference between very good products and truly special ones that touch on greatness."

- Chris Martens, HiFi+, May 2014

"Hugo's performance is consistent with mastering quality interfaces costing many times the price. The sound is awe inspiring, Hugo is the benchmark."

- Ed Harris, TheProAudioWebBlog, May 2014

Features:

- Plays all file formats including advanced PCM, 384kHz and DSD128, (DXD).
- Includes Chord's latest award-winning proprietary FPGA state-of-the-art DAC technology.
- Reference-class amplifier effortlessly drives the most demanding high-end headphones.
- Ten hours continuous playing time on the included NiCad re-chargeable batteries.
- Five digital inputs including Apt-X Bluetooth.
- Two mini-jack headphone outputs and one 1/4" headphone output.
- RCA outputs so you can also use Hugo's reference-quality DAC in your home stereo.
- Completely self-contained; delivers top performance without the need for an external power supply.
- Hugo's advanced digital volume control does not lose bits so you receive absolutely superior sound quality.
- Built to last; Hugo's casework is precision-machined from aircraft grade aluminum.
- Outstanding value at \$2,495.
