# INTRODUCING FEZZ AUDIO

FROM PIN-DROP SILENCE  
TO PURE STARTLING REALISM

RETAIL PRICE LIST  
MAY 2023

## THIRTY YEARS OF POWER MANAGEMENT

Toroidy is a well-known European manufacturer of high quality transformers who has for the past thirty years been providing power supplies to clients worldwide for a variety of applications including high-

end two channel audio products. With three patents in the field of toroidal transformer design and production, the company knew the significant advantages of using toroids in vacuum tube amplifiers.

In 2016, Fezz Audio was created to showcase the advantages of using this unique technology to deliver superior performance in high-end vacuum tube amplifiers. Fezz Audio's single-ended amps are the first in the world to

feature toroidal output transformers, preserving the unique character of single ended amplifiers while optimally coupling their limited power output to loudspeakers.

## THE ADVANTAGES OF SCALE

The quality of a tube amplifier is largely determined by the quality of its output transformers, and Toroidy, a sister company to Fezz, supplies high-quality toroidal transformers to a number of well-known audio manufac-

turers. This relationship provides Fezz with superb quality toroidal power and output transformers designed specifically for their amplifiers and at a lower cost than even ordinary transformers from other vendors.

## WHY TOROIDAL TRANSFORMERS?

With far lower flux leakage and less radiated energy than standard transformers, toroidal transformers ensure that the amplifier's sensitive circuitry doesn't pick up any additional

noise from the power supply. The result is extended bandwidth, flat frequency response, and low distortion. A patented winding process guarantees uniformity.

## CONFIGURED TO YOUR TASTES IN MUSIC

Fezz offers amplifiers in both single-ended and push pull configurations, allowing you to choose your preference and pair your favorite loudspeakers with the most suitable amplifier. The product range includes: inte-

grated amplifiers, preamplifiers, power amplifiers, headphone amps and phono stages as well as solid state products. And Fezz offers both single-ended and push-pull amplifiers featuring KT120, KT88, EL34, 300B and 2A3 tubes.

## ALFA LUPI

PCL86 Push Pull Class AB, 2 x 10W

Alfa Lupi is a stereo vacuum tube integrated amplifier, running the tubes in a push-pull configuration. As with all Fezz amplifiers, both power and output transformers are high-quality toroidal units. There are three RCA inputs, and a built-in volume control. The four PCL86 tubes produce holographic imaging, and with automatic biasing, are virtually maintenance-free. Alfa Lupi's 10 watts per channel will drive any reasonable loudspeaker and produce wonderfully musical sound.

## SILVER LUNA PRESTIGE

EL34 Push Pull Class AB, 2 x 35W

Silver Luna Prestige is an extremely versatile push-pull stereo integrated tube amplifier. Output tubes are the legendary EL34, and a mode switch can choose either tetrode or pentode operation; the input tubes are 12AX7/ECC83, and each unit is shipped with another pair of input tubes, type 6N2P. Four configurations are possible with the mode switch and choice of input tubes, allowing the amp's sound signature to be tailored to the user's preference. Silver Luna Prestige has three RCA inputs, and utilizes Toroidy toroidal power and output transformers for low noise and amazing dynamic abilities. Its 35 watts per channel allow a wide choice of speakers.

## TITANIA

KT88 Push Pull Class AB, 2 x 45W

Titania is a powerful and dynamic vacuum tube integrated amp. Output tubes are KT88s, input tubes are 12AX7/ECC83, and the outputs are operated in push-pull mode. Automatic biasing assures trouble-free operation. Tone is neutral, with superb bass control, aided by the toroidal power and output transformers. Frequency response is an astounding 18 Hz/103 kHz (-3 dB), providing airy treble and a full, well-defined soundstage. The 45 watts/channel will drive almost any loudspeaker to produce powerful, captivating sound. Remote control and tube cage are included, as they are with all Fezz Audio products.

## MIRA CETI 300B

300B Single Ended Class A, 2 x 8W

Mira Ceti is a very special amplifier, a single-ended stereo amplifier with 300B output tubes, producing full, saturated midrange, and the miraculous sense of palpable reality for which the 300B is famous. Input tubes are 6SN7, contributing to impactful sound. Power and output transformers are both toroidal, making the Mira Ceti models the world's only single-ended amps with toroidal output transformers. Paired with suitable speakers, the sound is beguiling.

### LYBRA 300B

300B Parallel Single Ended Class A, 2 x 15W

Lybra is a unique parallel single ended (PSE) amplifier with 300B output tubes. The PSE configuration provides the classic 300B sound with higher output, making Lybra extremely versatile, and able to pair well with a broad selection of loudspeakers. The PSE configuration is noteworthy by itself, and Lybra's utilization of toroidal power and output transformers make it unique. The 6SN7 and 12AX7 input tubes add to the character of Lybra, creating dynamic, impactful sound.

## TORUS 5060

Dual Mono Solid State Integrated Amp,  
65W into 8 Ohms

Torus 5060 is a solid state integrated amplifier with a range of features that make it suitable as the versatile heart of a high-quality audio system. A built-in digital-to-audio converter (DAC) allows connections to three digital sources, and phono stage and tape loop make Torus 5060 equally useful for analog sources. Bluetooth 5.0 provides hi-res wireless streaming; four line inputs, power amp mode and subwoofer output add to its compatibility. With 90 watts into 4 ohms, 65 watts into 8 ohms, Torus 5060 provides dynamic, effortless sound. An aluminum remote control is included.

### OMEGA LUPU

Headphone Amplifier PCL86 Push Pull Class AB  
Output Impedance 36-600 Ohms

Omega Lupi is a headphone amp that combines the unique PCL86 tube with toroidal power and output transformers. The output impedance can be adjusted by a front-panel knob to ensure perfect match with any type of headphone. The PCL 86 is a dual-filament tube, with both triode and pentode elements in a single capsule. Omega Lupi is capable of driving even the most-demanding headphones with open, spacious, and detailed sound.
